

Springs Family Chiropractic Constitution

The mission of our Springs Family Chiropractic clinic is to give you, your family members, and our community abundant life and true health through God given principles. Every day our expert team works to love and serve you, your family members, and every willing citizen of our Colorado community to achieve true sustainable health. Your true health is not based on how you look and feel, it is the state of optimal functioning in the nervous system physically, chemically and emotionally. We are teaching true health and restoring health with patients that want to ensure healthy living for the next 20 to 30 years. We promise to use expert protocols, techniques, and equipment that are state of the art for health restoration of illnesses, injuries, and chronic conditions.

- Our team asks that any new patient, to include all family members in their household, to obtain true health. All family members in a household will receive a complementary consultation and examination.
- All patients are monitored for progress and accountability with home therapy by monthly reevaluation examinations.
- Our team asks patients to put forth efforts to help family, friends, neighbors and coworkers to learn and obtain true health instead of being injured, sick, or suffering with disease.

Please sign that agree you are ready to change your health and quality of life for you, your family, and the community.
